Q47 - Web.xml and WEB-INF requirements

Which statements are true about the web applications created with Servlets 3.0:

- a. The web.xml file is required
- b. The web.xml file is not required
- c. The WEB-INF/ directory is required
- d. The WEB-INF/ directory is not required

[Hide answer](#)

b, d

Reference: page 107, 10.13 "Inclusion of a web.xml Deployment Descriptor"

Explanation: An application which is serving only a static content, **doesn't have to contain neither the WEB-INF directory, nor the web.xml file**.
